MATER DEI HIGH SCHOOL

MISSION STATEMENT

Mater Dei, a Catholic, diocesan regional high school, nurtures the spiritual, moral, intellectual, emotional, and social growth of young men and women. In a caring environment, respectful of individual differences, her comprehensive program educates, fosters faith, and develops gospel values.

PHILOSOPHY AND OBJECTIVES

Mater Dei High School is a regional Catholic school affiliated with the Roman Catholic Diocese of Belleville. Mater Dei is located in the midst of a cluster of small towns in an agriculturally-oriented part of southern Illinois on the outer edge of metro-St. Louis. The community is predominantly German Catholic and generally supportive of Mater Dei.

Rooted in Catholic belief and tradition, Mater Dei believes that every person is a unique manifestation of God's creative love. Through Baptism we have a unique Christian identity, and through identification with Jesus, we can realize our potential. Mater Dei accepts the responsibility, complementing that of parents and parishes, to foster faith and develop values based on Gospel truths.

Mater Dei recognizes the basic goodness and dignity of each person and respects the uniqueness, i.e., gifts and limitations, of each individual. Since we believe in each person's potential and responsibility for growth, the school provides a variety of opportunities to integrate the spiritual, intellectual, social, aesthetic, and physical aspects of the student through curricular and extracurricular programs.

Mater Dei is a caring community of students and parents, faculty and staff. Because we believe that people develop best in relationship with others, we continue to place a high priority on respect, cooperation, and friendliness. Most essential is a climate in which faith and values are freely communicated and lived.

In our attempt to help prepare students for their future as mature and responsible Christian adults, Mater Dei strives to provide quality academic and vocational programs suited to the talents and needs of each. These programs are designed in relation to the background and future plans of the student.

Mater Dei encourages a conscious and active faith that leads the student to ongoing personal growth and involvement within the life of the Church. Recognizing the Christian community's apostolic role in the world, we educate the student to a reverence for all life, to an awareness of the needs of the global community, and to a commitment to the values of peace and justice expressed in understanding, compassion, and service.

FAITH OBJECTIVES

1. To instill in each student a sense that he/she is a unique manifestation of God's love.
2. To provide students with a knowledge of the beliefs and morals of the Catholic Church.
3. To help students experience the value of personal prayer as an integral part of Christian life.
4. To prepare students to take an active part in parish worship.
5. To develop a working relationship with parishes in the area.

PERSONAL OBJECTIVES

1. To acknowledge the limitations and to identify, articulate, affirm, and nurture the gifts of each student.
2. To develop well-integrated young adults.
3. To encourage self-discipline.
4. To foster a desire for continual renewal of the spiritual, social, intellectual, and physical dimensions of each student.

COMMUNITY OBJECTIVES

1. To encourage mutual respect among faculty members, among students, and among faculty and students.
2. To encourage mutual support and cooperation in all areas.
3. To celebrate diversity which enriches and enlivens the community.
4. To develop a spirit of graciousness.
5. To foster Christian leadership and witness to faith and values.

ACADEMIC OBJECTIVES

1. To nurture intellectual development according to individual talents, needs, and abilities.
2. To develop the ability to think critically and creatively.
3. To enable students to communicate effectively.
4. To prepare students with the academic background necessary for post-secondary education or immediate entry into the workplace.
5. To instill an appreciation for mental discipline and lifelong learning.

SERVICE OBJECTIVES

1. To instill a sense of Christian discipleship through service to others.
2. To infuse a respect for all life as a gift from a generous God.
3. To heighten awareness of the global community and foster respect for all cultures.
4. To help students appreciate their own cultural environment within the context of a broader world perspective.
5. To inculcate the values of peace and justice.
6. To foster compassion through understanding.
7. To raise awareness of the uncomfortable tension that should exist in the life of a comfortable Christian.

GUIDANCE SERVICES

Guidance and Counseling Services

The purpose of the guidance and counseling program is to assist each student in making realistic and satisfying decisions about his/her present and future life, academically, personally, spiritually, and vocationally. The guidance program is uniquely structured to meet these diverse needs. There are three distinct groups that make up the Guidance and Counseling Services department. The academic advisor is a teacher assigned to each class who will assist students in their course selections and scheduling as well as monitor their academic progress. The Campus Ministry personnel comprise the second part of the guidance and counseling services. The Campus Ministry program seeks to foster spiritual growth of the faculty and students by sponsoring various opportunities and activities throughout the school year. The third member of the Guidance and Counseling program is the college placement counselor. The college placement program attempts to enable students to make satisfying vocational choices through a variety of individual and group activities. Awareness of the occupational world is fostered through career seminars and an array of reference books and current periodic literature. Information, guidance, and assistance are available for students preparing for entrance tests and applying for college, financial aid, and scholarships. The Guidance office is responsible for the administration of all standardized testing, including the EXPLORE high school placement test, PLAN (pre-ACT), PSAT and ACT college entrance tests.

Campus Ministry

Campus Ministry seeks to coordinate a total youth ministry reflecting the Vision Statement on Youth Ministry developed by the United States Catholic Conference. This ministry fosters personal and spiritual growth and seeks to draw young people to responsible participation in the life, mission, and work of the faith community.

The first concern of Campus Ministry is the individual student. One-on-one interaction with students and networking with a variety of helping agencies provide students with assistance when needed. In crisis situations, referrals are made through the Student Assistance Program.

Since Church is a community of individuals with different gifts, Campus Ministry programs challenge students to develop their unique talents. Campus Ministry especially strives to involve those students who are not active in any other co-curricular or extracurricular program. Leadership training and retreat facilitating are primary avenues for this type of growth.

The spiritual life of the students is enhanced by prayer and worship experiences. All-school Masses, sacramental celebrations, and prayer services are coordinated by Campus Ministry. Students have the opportunity to be involved in the planning, singing, and ministering at these services. Training is provided for Eucharistic Ministers, Lectors, and Ministers of Hospitality. Students who take part in Liturgy planning learn the basics of good liturgy.

In addition to prayer and worship, all students are provided with a day of retreat each year. These retreats are facilitated by young adults who have been specially trained and travel throughout the United States sharing their ministry.

All Mater Dei students are required to do Christian service. Campus Ministry assists with coordinating and raising awareness of service options. Retreats and other programs help fulfill these requirements. All seniors participate in the three-week Senior Service Project which is required by our diocese for graduation from high school.

Advocacy - Campus Ministry provides a comfortable atmosphere for students to air feelings and frustrations. The Campus Ministers, as much as possible, listen and seek to bring issues and concerns of young people to the appropriate office or agency.

Enablement of Youth - Campus Ministry seeks to provide opportunities for personal growth and leadership. Its Peer Ministry program enables young people to reach out and be present to their classmates in crisis situations. Liturgical trainings enable young people to take a more active role in the parish. Other programs develop skills and talents beneficial to youth.

ACADEMIC INFORMATION

Mater Dei High School is fully accredited by the State Board of Education and by the North Central Association of Colleges and Secondary Schools. Credits earned at the school are accepted at any college or university in the United States. Mater Dei High School is an institutional member of the National Catholic Educational Association and a member of the Illinois High School Association.

Graduation and Course Requirements

Students are required to have 24 units of credit including theology for graduation. These include 4 credits in religion (4 years), 4 credits in English (4 years), 3 credits in math, 2 credits in science, 2 credits in social studies including American history, ½ credit in consumer education, ½ credit in public speaking, ½ credit in fine arts and three weeks of a Senior Service Project in January of the senior year. For the P.E. requirement students must engage in physical education daily. Participation in band waives the P.E. requirement. Students may waive P.E. in grades 11 and 12 for the following reasons: 1) to participate in an interscholastic athletic program, 2) to enroll in an academic class required for admission to an institution of higher learning, or 3) to enroll in an academic class required for graduation from high school. Physical education in grades 9 or 10 will include one semester of health. Students must also pass a test on the U.S. Constitution, Illinois Constitution, flag, voting procedures, and Declaration of Independence to graduate. During the freshman year students will be required to take one semester of fine arts.

To receive credit from Mater Dei High School for a class taken at another institution, while enrolled at Mater Dei, the student must first seek approval from the principal.

Curriculum requirements for college admission may exceed high school graduation requirements. It is the responsibility of the student to select coursework to meet his/her specific goals.

Grading System

A student will receive a letter grade for each academic course. The standard scale is as follows: A = 100 - 93, B = 92 - 85, C = 84 - 77, D = 76 - 70, F = 69 - 0. The honors scale, utilized for courses the Faculty Council has deemed accelerated, is as follows: A = 100 - 91, B = 90 - 83, C = 82 - 75, D = 74 - 68, F = 67 - 0.

For the purpose of determining a grade point average, the following quality points are assigned: A=4, B=3, C=2, D=1, and F=0. A semester grade is calculated by counting each quarter's grade as 2/5ths of the final grade and the semester exam as 1/5 of the final grade.

Incompletes may be given at the end of the first and third quarters. The time limit given for make-up work is at the decision of the teacher. Driver's Education class is not awarded credit; therefore, a P or NP is indicated on the report card.

Grade Point Average and Rank in Class

Grade point average and rank in class are based on the semester grades. The total quality points are divided by the number of credits taken. This accumulative grade point average determines class rank with the averages arranged in descending order. The student with the highest grade point average (G.P.A.) ranks first, etc. All course offerings are counted in the grade point average except driver education. Rank in class is one of the most important criteria used by colleges and employers in judging the eligibility of a student or an employee.

Registration Procedures and Schedule Changes

Freshmen registration takes place in February and upperclass students register in March. Prior to that time, students should review the Curriculum Guide and discuss possible course selections with teachers, class advisor, and parents. Recommendations are done for all students in english, math, science and foreign languages. For upperclassmen, the registration form is marked accordingly and a parent signature is required. It should be noted that some courses may be dropped due to enrollment or availability of appropriate personnel. Any changes in course selections requested after July 1 are not guaranteed, and a \$5 fee is charged.

Honor Classes - Requirements and Procedures

Honors classes are offered at Mater Dei High School to provide additional challenge to the academically talented. Students are recommended for honors classes. For incoming freshmen, recommendations are made by the department chairperson using primarily the placement test scores, grade school teachers' recommendations, and 7th and 8th grade report cards. Upperclassmen are recommended by teachers based on their academic performance, motivation, self-discipline and sense of responsibility. The specific criteria will vary from department to department. The number of honors classes is dependent on student needs.

Students wishing to be included in honors classes who were overlooked or not selected can petition in writing for admission into the Honors Program. This written request must be signed by the parent. The departments and academic advisors will review the request and make a recommendation. This recommendation will be given to the parents and the student at a conference with his/her advisor and a department representative. At this meeting a final decision will be made. While parents and students have the right to request honors classes even when the other criteria have not been met, their continued involvement in the class will depend upon their success. In general, the honors class will move at a considerably faster pace; it will study material in more depth than regular classes; and it will require advanced critical thinking and problem solving. Other specific differences will be found in the course descriptions of the various departments .

Report Cards and Deficiency Notices

The school year is divided into four grading periods and a report card is issued at the end of each quarter. Midway through each quarter midterm reports will be sent through the Parent PlusPortal for all students in all classes. Students and parents are encouraged to discuss the report card and midterm notices. If there are questions, parents are urged to contact the teacher. Conferences and/or staffings are arranged as needed.

Parent-Teacher Conferences

Parent-teacher conferences are scheduled at the end of the first and third quarters. Parents are requested to pick up their son or daughter's report card in the office during the conference hours. Teachers are available for a brief discussion of student progress. If a lengthy meeting is needed, arrangements can be made for another convenient date.

Failures

If a student fails a semester of a course that is required for graduation, that semester must be repeated. If the failed course is not required for graduation, then it is not necessary for the student to retake the class. No credit is awarded for failed classes.

Due to the cumulative nature of skills needed in mathematics and foreign language courses, unique procedures apply to failures in these departments. Two situations are possible if a semester is failed.

SITUATION 1: If a student fails the first semester but passes the second semester, the student does not have to repeat the first semester. A full credit is received for the year course, but the F remains on the transcript for the first semester.

SITUATION 2: If a student passes the first semester but fails the second semester, .5 credit is given for the first semester only. The first semester is then audited before repeating the second semester.

Academic Assistance

Peer Tutoring

A student who needs additional academic assistance may request that his/her teacher or class advisor arrange peer tutoring, which is provided during school-wide study halls by members of the National Honor Society.

RTI

A student whose quarter average falls below 74% is placed in RTI (Response to Intervention). While in RTI, the student meets with the teacher to get additional assistance.

Resource Teacher

A resource teacher provides one-on-one assistance to students needing additional instruction.

Honor Roll

An honor roll is published at the end of each quarter and semester based on a student's GPA for each specific grading period. To attain 'High Honors' students must have an average of 3.8 on a 4.0 scale. Students with an average of 3.5 are named to 'Honors'. Only students taking at least five academic courses, including religion, can be considered for the honor roll.

Summer School

One or more classes may be offered during the summer at Mater Dei or another area high school. Specific courses will be determined by the needs of the students. A separate tuition fee will be charged and the amount of the fee will vary depending on the class. In order to be cost effective, it will be necessary to set minimum enrollments.

Before taking a class at another institution, a student must seek approval from the principal to receive Mater Dei credit for the course taken.

Student Records and Transcripts

"Official records are maintained at Mater Dei High School. In accordance with section 438 of the U.S. Public Law 93-380 known as the Family Education Rights and Privacy Act of 1974, and the Illinois School Student Record Act of 1975 (pursuant to Chapter 122, Article 50, Illinois Revised Statutes 1975), parents and students have the right to inspect and review all official school records directly related to their children and must, with certain exceptions, (Buckley Amendment, dated June 17, 1976), give written consent if any information is released by the school. The permanent records are kept for a period of 60 years while the students' temporary records are destroyed one year after the student has transferred or graduated or otherwise permanently withdrawn from our school. This is our official public notice concerning records and their destruction.

Computer Literacy

It is the goal of Mater Dei that all graduates will be computer literate, will know and respect software copyright legislation, and will appreciate computers as valuable tools. In order to achieve these goals, all Mater Dei students are given access to and are instructed in the use of a personal computer. Students are first assigned individual accounts during the required freshman study skills class. At that time, they are introduced to the school-wide network, to word processing, and to research oriented electronic databases. Transfer students are accommodated on an individual-needs basis. A number of electives dealing with more specific computer skills are available to non-freshmen. All faculty members have access to the computer labs and are encouraged to incorporate computer use in ways appropriate to their classes.

Nondiscriminatory Policy

Mater Dei High School, Breese, Illinois, admits students of any race, color, national and ethnic origin to all the rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, national and ethnic origin, in administration of its educational policies, admissions policies, scholarship and local programs, and athletic and other school-administered programs.

Kaskaskia College Dual Credit

Kaskaskia College and Mater Dei Catholic High School have teamed up to offer the students of Mater Dei an opportunity to get a jump start in college. The Dual Credit program provides for qualified high school juniors and seniors to begin experiencing the academic rigors of college course work while still in high school. In addition to receiving credit towards high school graduation for selected courses, students will have the opportunity to receive college credit for the same course work through Kaskaskia College. Each dual credit course will have its own requirements for student enrollment in the course. Mater Dei will have the final decision on a student's placement.

Dual credit classes will only be given high school credit when the course is offered through a Mater Dei High School approved dual credit program.

There will not be any additional fees associated with this program. Kaskaskia College will issue the college transcript for all credit earned under this program. It will be the responsibility of the student to request the Kaskaskia College transcript when entering other colleges or universities.

The following courses will be offered for Dual Credit for the 2017-2018 school year:

English 101	Advanced Computer Applications
English 102	Chemistry II
Speech 103	Physics Honors
Accounting	Building Trades II
Marketing w/Small Bus.Mgmt.	Sociology
CISCO	Psychology
	Weightlifting & Conditioning

Activities

Art/Photo Club	Chorus	Liturgical Planning	Softball
Bands	CrossCountry G-B	Murray Center Vol.	Spanish Club
Baseball	Dance	National Honor Soc.	Spring Musical
Basketball G-B	Fall Play	Newspaper Staff	Student Ambassadors
Bass Fishing	Flag Corps	Peer Assistance	Student Council
Big Bros.&Sist.	FBLA	Retreats	Teens for Life
Book Club	Football	St. Vincent De Paul	Track G-B
Bowling	Golf G-B	Scholar Bowl	Volleyball
Cheerleading	Homecoming	Science Club	WYSE
Chess Club	Liturgical Music	Soccer G-B	Yearbook Staff

TESTING PROGRAM

THE EXPLORE HIGH SCHOOL PLACEMENT TEST is given to eighth grade students who plan to attend Mater Dei High School. The test results are used by department chairpersons in the recommendation process and can assist students in making realistic course selections. The test covers English, math, reading, and science reasoning.

PLAN is an assessment administered to all sophomores. PLAN has a dual purpose. It provides students and their parents with detailed information needed to build solid educational and career goals. It includes a study skills assessment, interest inventory, and a section for student-reported needs, plans, and goals. PLAN will also help students prepare for the ACT college entrance test by measuring skills in American College Testing, the same company that produces the ACT College Placement Test. Scholarship qualification as well as college entrance is partially determined by the ACT test results along with high school grade point average (GPA) and class standing.

ARMED SERVICES VOCATIONAL APTITUDE BATTERY (ASVAB) is available to juniors or seniors interested in military service. It is a useful vocational interest inventory for any student and is applicable to many civilian occupations and career fields.

THEOLOGY

141 Theology I

Freshmen

1 semester

1/2 credit

The Revelation of Jesus Christ in Scripture: This course provides students with a general knowledge and appreciation of the Sacred Scriptures. Through their study of the Bible, they will encounter the living Word of God, Jesus Christ. They will learn about the Bible, authored by God through Inspiration, and its value to people throughout the world. If they have not been taught this earlier, they will learn how to read the Bible and will become familiar with the major sections of the Bible and the books included in each section. The students will pay particular attention to the Gospels, where they may grow to know and love Jesus Christ more personally.

142 Theology I

Freshmen

1 semester

1/2 credit

Human Sexuality: The course allows students to develop a greater understanding of and respect for our human sexuality. Christian values and morality will serve as the foundation for this holistic growth and development.

143 Theology II

Sophomores

1 semester

1/2 credit

Who is Jesus Christ?: This course introduces students to the mystery of Jesus Christ, the living Word of God, the Second Person of the Blessed Trinity. Through this course, students will understand that Jesus Christ is the ultimate Revelation to us from God. In learning about who Jesus is, the students will also learn who he calls them to be.

144 Theology II

Sophomores

1 semester

1/2 credit

The Mission of Jesus Christ (The Paschal Mystery): This course helps students understand all that God has done for us through his Son, Jesus Christ. Through this course, students will learn that for all eternity, God has planned for us to share eternal happiness with him, which is accomplished through the redemption Christ won for us. Students will learn that they share in this redemption only in and through Jesus Christ. They will also be introduced to what it means to be a disciple of Christ and what life as a disciple entails.

145 Theology III

Juniors

1 semester

1/2 credit

Jesus Christ's Mission Continues in the Church: This course helps students understand that in and through the Church, they encounter the living Jesus Christ. They will be introduced to the fact that the Church was founded by Christ through the Apostles and is sustained by him through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today. This Body has both divine and human elements. In this course, students will learn not so much about events in the life of the Church, but about the sacred nature of the Church.

146 Theology III

Juniors

1 semester

1/2 credit

Sacraments as Privileged Encounters with Jesus Christ: This course helps students understand that they can encounter Christ today, in a full and real way, in and through the sacraments, and especially through the Eucharist. Students will examine each of the sacraments in detail so as to learn how they may encounter Christ throughout life.

147 Theology IV

Seniors

1 semester

1/2 credit

Life in Jesus Christ: This course helps students understand that it is only through Christ that they can fully live out God's plans for their lives. Students will learn the moral concepts and precepts that govern the lives of Christ's disciples.

148 Theology IV

Seniors

1 semester

½ credit

Living as a Disciple of Jesus Christ in Society: This course introduces students to the Church's social teaching. In this course, students will learn how Christ's concern for others, especially the poor and needy, is present today in the Church's social teaching and mission.

149/150 Faith Formation Program

Senior

1 year

1 credit

Faith Formation Teacher: Eligible Seniors will serve as Faith Formation teachers in an elementary classroom in a specifically chosen Faith Formation Program in the surrounding area. There will be an interview required of the student with a Mater Dei Faculty member and the Parish leader (DRE, CRE, Pastoral Associate, etc.). The student will be required to complete the Diocesan Child Protection Training. The student will be required to teach religion in an elementary classroom on the days required by the Faith Formation program, preparing daily classroom lesson plans with their implementation. The student will work with a faculty member on planning lessons, training/researching ideas for good discipline in the classroom, using a teacher manual, and recording and assigning grades. The student will also complete outside reading and reports; attend faculty meetings of the Faith Formation Program and work with the parish leader individually. This class is a requirement for graduation in place of or in addition to the senior theology courses.

Service

Service applies to all religion classes. In keeping with the U.S. Bishops' pastoral on Catholic education and Mater Dei's philosophy, each course will include a service component designed to aid the Community of Believers to involve themselves in personal acts of loving concern for others as well as actions that seek for justice and peace - "...service to the Christian community and the entire human community." (#14 To Teach As Jesus Did, National Conference of Catholic Bishops, November, 1972.)

Senior Service Project (3 weeks in January is mandatory for graduation).

BUSINESS EDUCATION

743 Consumer Economics

Seniors, Juniors

1 semester

1/2 credit

This course fulfills the Illinois requirement for consumer education. The purpose of this course is to develop understanding of consumer economics. Curriculum covered will include banking, housing, insurance, credit, taxes, budgeting, investing, and consumer rights. Economics will be covered including micro and macro economics. Other topics will include monetary and fiscal policies, different economic systems, and the role of global trading.

This is a required course for graduation.

746 Marketing

Seniors, Juniors

1 semester

1/2 credit

This course offers a comprehensive overview of the field of marketing. Curriculum covered will include market research, marketing careers, and the marketing mix. Determination of various market segments, based on various types of psychological and social influences on consumer behavior, will be inclusive in this course. Students will be required to actively participate in a group business project. (This course may fulfill a Social Studies credit for some colleges).

747 Computer Applications

Seniors, Juniors, Sophomores

1 semester

1/2 credit

This course will familiarize students with features of Microsoft's Office suite—Word, Excel, PowerPoint, and Access. Students will follow project exercises from the text and apply their knowledge to lab exercises. A comprehensive lab exercise at the end of each quarter will test a student's knowledge of the programs. Students will also learn basic file maintenance, including creating folders and copying files.

751 Advanced Computer Applications

Seniors, Juniors, Sophomores

1 semester

1/2 credit

Dual Credit with KC (4 credit hours)

This course is a continuation of Computer Applications. Students will do text projects using some of the advanced features in Microsoft's Office 2016 which includes Word, Excel, Access, and Power Point. Comprehensive projects will be completed at the end of each quarter. This course will qualify for Dual Credit with Kaskaskia College.

Pre-requisite: Computer Applications

756 Business Law

Seniors

1 semester

1/2 credit

This course is designed to develop knowledge of the legal system. Topics include the court system, civil law, criminal law, contract law, torts, and copyright laws. Incorporated into the curriculum will be the various government agencies that regulate and set standards for business and how business ethics is applied to the different aspects of business operations.

767/768 Accounting Principles

Seniors, Juniors

1 year

1 credit

Dual Credit with KC (3 credit hours)

This course will study the accounting cycle for the proprietorship and corporation types of businesses. Students will learn to journalize transactions in multicolumn journals and post the entries to ledgers.

Students will also perform end-of-fiscal period activities such as preparing work sheets, financial statements, and adjusting and closing entries. Students will also perform accounting activities on the computer using the automated accounting software. This course will qualify for Dual Credit with Kaskaskia College.

780 Office Assistant

Seniors

1 semester

1/2 credit

This course is designed for the student who wishes to pursue an office career after graduation. The student will assist office personnel in answering the telephone, photocopying and assembling documents, filing, simple computer assignments, mailings, and other miscellaneous office jobs.

704 CISCO Networking Basics

Seniors, Juniors

1 semester

1/2 credit

Dual Credit with KC (4 credit hours)

This course is the first of four courses that will lead to the Cisco Certified Network Associate (CCNA) certification. This course introduces the student to the networking field. Networking terminology, protocols, and standards of Lan's and Wan's. Students will develop skills in medium connections, network devices, IP addressing, network standards and the different layered approach to networking.

705 CISCO Routing and Switching

Seniors, Juniors

1 semester

1/2 credit

Dual Credit with KC (4 credit hours)

This course is the second course leading to the CCNA certification. Students will develop skills to configure a router, manage IOS software, configure routing protocols, create access control lists. Students will monitor, protect and troubleshoot a network.

Prerequisite: Networking Basics

758 Small Business Management

Seniors

1 semester

1/2 credit

Dual Credit w/KC if Marketing is also taken (3 credit hours)

This course is designed to allow a student to successfully start a small business. Included in the curriculum are marketing and management skills used in the daily operations of the business. Office procedures including basic recordkeeping, pricing theory, promotion, and store layout will be a part of the curriculum. The student will be introduced to employment procedures, employee retention, labor laws and business communications.

771 Web Page Design

Seniors, Juniors

1 semester

1/2 credit

This course is designed to teach students proper web page design techniques. The course will also introduce students to the proper procedures to create web pages suitable for course work, professional purposes, and personal use. Students will work from an instructional book and will eventually be able to create web pages on their own. Students will use various web page applications to create different types of web pages.

DRIVER EDUCATION

900 Driver Education

Sophomores, Freshmen

1st Quarter or 3rd Quarter

No credit

This class is designed to provide the student with the basic knowledge of vehicle operation, traffic laws, and basic maintenance of the vehicle. Vehicle operation will include maneuvering skills as well as skills in cooperating with other drivers. Vehicle maintenance includes service checks normally performed during service station stops. Driving phase of the program will provide students a minimum of six hours of instruction to include highway, expressway, and city driving. The “rules of the road” and the “Illinois Vehicle Code Manual” are used as supplements to the traffic law curriculum.

901 Driver Education (Summer)

Sophomores, Freshmen

No credit

This class offers the classroom phase only. Behind-the-wheel driving will take place during the following school year.

ENGLISH

253/254 English IA

Freshmen

1 year

1 credit

This course is highly individualized in order for students to advance in reading, writing, and study skills according to their levels of performance. This course will cover units of study in fiction, nonfiction, grammar, composition, and vocabulary. Placement in this course is based on test scores and department recommendation.

209/210 English I

Freshmen

1 year

1 credit

English I includes the practice and development of all language arts skills. Emphasis is on the integration of grammar and basic composition and reading skills. This course also introduces the student to the major literary genres in fiction and nonfiction. Placement in this class is based on test scores and department recommendation.

225/226 English I - Honors

Freshmen

1 year

1 credit

This course is designed for the self-motivated student who is advanced in reading and verbal skills. Students will study major literary genres in fiction and nonfiction. The student is responsible for independent reading throughout the year. The review of grammar and usage is minimal based on the student’s proficiency. This course also includes composition and vocabulary. Since this is an honors class, the pace is accelerated. Placement in this class is based on test scores and department recommendation.

255/256 English IIA

Sophomores

1 year

1 credit

English IIA builds upon the instruction of English IA. It further develops a reading and writing program. This course will continue the study of topics introduced in English IA in an individualized manner. Placement in this class is based on department recommendation.

212/213 English II

Sophomores

1 year

1 credit

English II includes a review of grammar skills with further development of composition skills and reading skills. The major literary genres introduced in English I are further developed. Placement in this class is based on department recommendation.

227/228 English II - Honors

Sophomores

1 year

1 credit

This course is intended for the advanced student. The review of grammar and usage is minimal and is largely the student's responsibility. In-depth analysis of literature and comprehensive composition assignments are required of the honor student. Students are expected and encouraged to work on an independent level. Since this is an honors class, the pace is accelerated. Placement in this class is based on department recommendation.

PROGRAM SEQUENCE FOR JUNIORS AND SENIORS

Program I - Developing Ability Level

Junior year - Practical Writing & Short Literature I

Senior year - Effective Writing & Short Literature II

Program II - Proficient Ability Level

Junior year - Composition and American Literature

Senior year - Methods of Writing and English Literature

Program III - Skilled Ability Level

Junior year – Composition Honors and American Literature Honors

Senior year -- English Comp. 101(dual credit) and 102(dual credit)

232 Short Literature I

Juniors (Program I)

1 semester

1/2 credit

This course is highly individualized in order for students to advance their reading and writing skills. This course examines American literature including short stories, poetry, plays, novels, biographies and autobiographies. The course includes varied writing assignments. Placement in this class is based on department recommendation.

234 Practical Writing

Juniors (Program I)

1 semester

1/2 credit

This course strives to develop writing skills for both practical and creative application. Students learn to apply the writing process to varied writing assignments. This course also includes the study of short fiction and non-fiction to aid in the study of comprehension and vocabulary. Placement in this class is based on department recommendation.

236 American Literature

Juniors (Programs II)

1 semester

1/2 credit

This course acquaints students with significant American writers of literary eras from Native Americans to the Twentieth Century. The primary aim of the class is to analyze literature and gain an understanding of the authors in historical context. Requirements include a literary analysis based on outside reading. Works studied include nonfiction, poetry, short stories, drama, and novels. Placement in this class is based on department recommendation.

215 Composition

Juniors (Program II)

1 semester

1/2 credit

This course focuses on the following: persuasive writing which involves the use of logic and other skills of argumentation; writing the college admissions essay; developing skills in descriptive, narrative, and expository writing; and the refinement of grammar & mechanics. This course also includes reading a novel, which is discussed in class, followed by writing a literary essay. Students learn some refinements of writing style and broaden their vocabularies. A segment of the course involves minimal research. Placement in this class is based on department recommendation.

235 American Literature Honors

Juniors (Programs III)

1 semester

1/2 credit

This course is designed for the self-motivated student who has demonstrated advanced reading and verbal skills. This course acquaints students with significant American writers of literary eras from the Native Americans to the Twentieth Century. Requirements include a literary analysis based on outside reading. Works studied include poetry, short stories, drama, novels, and nonfiction. The honors class will move at an accelerated pace, and students are expected to work independently. Placement in this class is based on department recommendation.

214 Composition Honors

Juniors (Program III)

1 semester

1/2 credit

This course is designed for students who demonstrate a solid grasp of the mechanics of rhetoric. Students will focus on persuasive writing, which involves the use of logic and other skills of argumentation. They will also write a college admissions essay, a literary essay, and develop skills in descriptive, narrative, and expository writing. The course will develop refinement of grammar and mechanics, and a segment of this course will include research. Honors students will be expected to compose longer essays and work at an accelerated pace. Students must be able to work independently on the novel. Placement in this course is based on department recommendation.

233 Short Literature II

Seniors (Program I)

1 semester

1/2 credit

This course examines English literature in an individualized manner. Students will cover a variety of genres of literature, which includes short stories, poetry, plays, novels, biographies, and autobiographies. Varied writing assignments are included within the context of the course. Placement in this class is based on department recommendation.

241 Effective Writing

Seniors (Program I)

1 semester

1/2 credit

This course is designed to develop effective writing and reading skills in an individualized manner. Writing skills will center on summary, description, and life skills (resumes, job applications, and interviews). Placement in this class is based on department recommendation.

239 English Literature

Seniors (Program II)

1 semester

1/2 credit

This course offers a survey of the history and literature of England from 450 A.D. to the Romantics. It acquaints the student with writers and works of the Western literary tradition. The primary aim of the class is to analyze literature and gain an understanding of the authors in historical context. Requirements include creative, expository, and research writing related to the selections studied in class. Placement in this class is based on department recommendation.

242 Methods of Writing

Seniors (Programs II)

1 semester

1/2 credit

Methods of writing is a course designed to prepare students for college-level writing. Students develop library skills, including the use of online databases for the purpose of research. Essay writing focuses on expository writing, critical analysis of literature, and an argumentative research-based paper. An oral presentation is also required. Placement in this class is based on department recommendation.

251 English Composition 101

Seniors (Program III)

Fall semester

1/2 credit

Dual Credit with KC (3 credit hours)

English Composition 101 is an expository essay writing course. This course (1) develops awareness of the writing process; (2) provides inventive, organizational and editorial strategies; (3) stresses the variety of uses for writing; and (4) emphasizes critical skills in reading, thinking, and writing. Students will compose a minimum of 5,000 words, including a literary analysis.

Prerequisite: ACT English section score of 18, minimum 3.0 GPA, and department recommendation.

252 English Composition 102

Seniors (Program III)

Spring semester

1/2 credit

Dual Credit with KC (3 credit hours)

English Composition 102 focuses on research, argumentative prose and critical analysis. Students develop library skills, including the use of online databases for the purpose of research; master outlining, summarizing, and paraphrasing; and learn to avoid plagiarism through correct documentation. A major component of the course is writing a documented, multi-sourced argumentative essay. Students will compose a minimum of 5,000 words, including a literary essay.

Prerequisite: English Composition 101

248 Speech 103

Juniors, Seniors

1 semester

1/2 credit

Dual Credit with KC (3 credit hours)

This course develops the students' basic speaking skills, and emphasizes personal adjustment to the speaking situation. Research and discussion skills will be incorporated. This course fulfills the Mater Dei graduation requirement and provides Kaskaskia College credit.

THE FINE ARTS

801/802 Concert Band

Senior, Junior, Sophomore, Freshman Instrumentalists 1 year 1 credit

This course develops fundamental musical skills through the study and performance of a wide variety of wind band repertoire. Students perform a literature from various historical contexts and styles in both large and small ensemble settings. The Concert Band performs in a concert each quarter, in addition to the graduation ceremony. All Concert Band students are welcome to participate in Marching Band and Pep Band.

805/806 Jazz Band

Senior, Junior, Sophomore Instrumentalists by Audition 1 year 1 credit

This advanced instrumental course develops musicianship through the study of improvisation, music theory and various styles of jazz music. The course develops student's ability to improvise through intensive study of music theory, arranging, transcription and weekly playing assignments. Students are constantly playing on their own and learning occurs in both rote and written formats. In addition to performing at concerts at the end of every quarter, the jazz band occasionally performs at community outreach events.

823/824 Wind Ensemble

1 year ½ credit

Senior, Junior Instrumentalists;

Sophomore, Freshman Instrumentalists by Audition

This course is open to all junior and senior instrumentalist, as well as freshmen and sophomore instrumentalists via audition. This advanced band course offers students the opportunity to study and perform a variety of challenging repertoire from various stylistic and historical contexts. This group meets during period 2 and period 6 study halls and performs at a concert each quarter, in addition to the graduation ceremony at the end of each year (graduation not required for senior members). All Wind Ensemble students are welcome to participate in Marching Band and Pep Band.

808 Chorus

Seniors, Juniors, Sophomores, Freshmen 1 semester 1/2 credit

This class is designed to develop greater vocal independence. Sight singing and a vocabulary of music are developed for greater music literacy upon completion of this course. Solo and ensemble singing will be the major vehicles. There will be assignments and tests periodically throughout the semester. All choral performances are mandatory. This class may be taken for a full year.

810 Music Theory 1

Seniors, Juniors, Sophomores Spring Semester ½ credit

Students will advance their knowledge of music theory through musical analysis and historical backgrounds of composition. The course will start out with basic theory and advance to more complex theory throughout the semester. Students will complete assignments including worksheets, tests, and compositions which will be performed and analyzed in class to further their knowledge of music theory. The students will then apply these concepts in band, chorus, solo literature, and individual practice in order to develop their skills as a performer and musician.

815/816 Noon Chorus

Seniors, Juniors, Sophomores, Freshmen

1 semester

1/4 credit

Chorus meets daily for 20 minutes. Goals include music literacy achieved through a systematic approach to reading the rhythmic and melodic vocabulary of printed music and the experience and performance of many styles of choral ensemble literature. Evening rehearsals will be arranged before performances. All choral performances are mandatory. This course may be taken for a full year.

814 Arts Appreciation

Freshmen only

1 semester

1/2 credit

This course will introduce students to art and music. One quarter will be devoted to the study of the visual arts and the other will be spent learning about music. The music class will lead the students through a study of western music, beginning with modern popular music and branching out. The goal of the class is to provide the students with a way to communicate about music, and to understand music that they are currently unfamiliar with.

The art class introduces to a variety of styles of Visual Art. We also are introduced to the elements of the principles of making an artwork and practice this in a sketchbook. The goal of the class is to provide the students with a way to organize an artwork of their own.

861 Art Graphics

Seniors, Juniors, Sophomores

1 semester

1/2 credit

This is a first level course. In one semester the course will focus on the creative aspects of using a computer to produce various types of commercial art and graphics. Areas to be coordinated in a layout are the use of lettering, creation of images, and use of digital imaging.

862 Drawing and Design

Seniors, Juniors, Sophomores

1 semester

1/2 credit

This first year level course will introduce the students to the basic elements of drawing from reality. Students will learn to design a composition, illustrate in line, shape and shadow. The students will be introduced to a variety of media to complete a drawing.

863 Ceramics

Seniors, Juniors, Sophomores

1 semester

1/2 credit

This first level course will introduce the student to basic hand building and glazing techniques. Functional and non-functional design will be explored. Instruction on the potter's wheel will depend on the availability and time allows.

Prerequisite: 862 Drawing and Design

865 Advanced Ceramics

Seniors, Juniors

1 semester

1/2 credit

This second level course will introduce the student to the pottery wheel and glazing methods. Functional and nonfunctional design will be explored. All pieces will be wheel thrown.

Prerequisite: 863 Ceramics

866 Advanced Drawing and Design

Seniors, Juniors

Spring semester 1/2 credit

This second level course will give the student the opportunity to explore further how to draw from reality. The students will also have the opportunity to use computer software as an additional tool to completion of an artwork. This course provides the opportunity to develop a portfolio for college admission or scholarships.

Prerequisite: 862 Drawing and Design

867 Portfolio of Advanced Art Projects

Seniors

Fall semester 1/2 credit

This second level course is available for students pursuing a career in art. The student will develop a portfolio of artworks to be presented to colleges for contest, scholarship and admission to college. The students will display portfolios at school activities.

Prerequisite: 862 Drawing and Design

FOREIGN LANGUAGE

The Foreign Language program offers a student the opportunity to develop proficiency in a second language and culture thereby enabling the student to acquire skills, knowledge, and attitudes important for living and working in a multi-lingual, multi-cultural world. Most colleges and universities have a foreign language entrance requirement of a minimum of two consecutive years of the same foreign language. A student in a college preparatory program is strongly advised to continue studying a foreign language beyond the two years most colleges and universities require for admittance. In addition to the foreign language college entrance requirement, many colleges and universities have a foreign language graduation requirement. Being able to communicate in a second language increases a student's ability to communicate with many more people, to appreciate different cultures, to travel with greater ease, and to enhance and provide unique opportunities for future employment.

Level I and II foreign language courses are part of a two-year basic foreign language program. All foreign language courses are yearlong courses. These courses must be studied consecutively and in sequence in the same language without stepping out a year between levels.

Required Recommendation: Foreign language courses are not basic level courses. All foreign language courses require the student to be recommended for enrollment by the Foreign Language Department. A Level I course requires a certain acceptable mastery of basic academic skills for a student to be recommended to enroll in a Level I course. All future Level 2, 3, 4, 5 courses require the student to be recommended for each course. To be recommended to continue on to the next level, the student is required to attain and demonstrate an acceptable level of knowledge and accomplishment in his or her present foreign language course. Each Mater Dei student is classified as either a recommended or a non-recommended student for foreign language study. An incoming freshman student classified as non-recommended must obtain permission from the Foreign Language Department Chairperson in order to enroll in a foreign language course. Once a student is enrolled in a foreign language, his/her achievement is assessed annually to determine eligibility for the next level. The foreign language teachers and department chairperson make a recommendation for the following year.

Junior High Spanish: Any incoming freshman student that has studied a high school level Spanish course in junior high school will take the Foreign Language Placement Test. The test evaluates the student's knowledge and acquisition of the material studied during a high school level one course. The student's test results will determine placement in either Spanish 1 or Spanish 2. Please contact the Foreign Language Department chairperson for test information. No credit is given for junior high school coursework.

Foreign Language Placement Test for Spanish: A student scoring 80% or higher will be enrolled in Spanish II. A student scoring 79% or lower will be enrolled in Spanish I or Spanish I Honors. The All Saints Academy Spanish I students will take the test at All Saints Academy. All other students will need to contact the Foreign Language Department chairperson to arrange a time to take the test.

Failure Policy: If a student fails the first semester and passes the second semester, the first semester does not have to be repeated. The F grade remains on the transcript for first semester and 1 full credit is received for the year course. If the first semester is passed and the second semester is failed, the first semester is to be audited the following year before repeating the second semester. The first semester passing grade is recorded on the transcript with a .5 credit. The failing grade F for the second semester carries no credit.

650/651 Spanish I

Freshmen, Sophomores, Juniors

1 year

1 credit

This course is part one of the two-year basic foreign language program. During the first year the student is introduced to the four basic language skills: speaking, listening, reading, and writing. The student will acquire a practical vocabulary usable in everyday situations and will learn the basic grammatical structures of the language. Internet activities, situational videos, computer software, and a variety of instructional activities will enhance these language skills. Students will work in pairs to develop oral proficiency of the material in each chapter. Thus, a strong commitment is needed by the student to use the language during class. The culture and civilizations of the various peoples will be studied through special presentations, films, and projects. Upon completion, the successful student will be able to express himself or herself on an elementary level in the four language skills, will be able to ask and answer simple questions, and will have an introductory knowledge of culture.

Prerequisite: Recommendation by Foreign Language Department

658/659 Spanish I Honors

Freshmen

1 year

1 credit

No prior study or knowledge of Spanish is required for the Spanish I Honors course. The Spanish I Honors course is designed for the self-motivated student who develops a well-developed mastery of basic grammatical structures in English and as well as a mature sense of study skills. The honors student learns at a faster pace; generally requires minimal drill/exercises; and quickly incorporates the vocabulary, grammar, and oral skills. This provides more class time to develop additional language skills and do more activities. This faster pace Level 1 one course is part one of the two-year initial foreign language program. Please refer to the Spanish I course description for additional information about Level I Spanish. Upon completion of Spanish I Honors, the successful student will have a limited ability to speak and write in Spanish.

Prerequisite: Enrollment is limited and is only by Foreign Language Department recommendation.

652/653 Spanish II

Freshmen, Sophomores, Juniors, Seniors

1 year

1 credit

During the second year course, the student will review the basics of level one and will continue to study and learn the various verb tenses and grammatical structures with much emphasis placed on the acquisition and enrichment of vocabulary. Upon successful completion of the second year of study, the student will be able to converse in limited everyday situations. The course requires students to work in pairs to promote acquisition of the material in each chapter. A strong commitment by the student is needed for success in the course and to gain oral proficiency of the course material. Situational videos, dialogues, Internet activities, and language activities will all develop the acquisition of the language. The study of culture will continue to provide the student with a greater appreciation for the language and its people.

Prerequisite: Spanish I or Spanish I Honors; and Foreign Language Department recommendation.

660/661 Spanish II Honors

Sophomores, Juniors

1 year

1 credit

The Spanish II Honors is the second year course for the self-motivated student who has excelled in Spanish I or Spanish I Honors. The course moves at a faster pace than Spanish II while at the same time recycles material from Spanish I or Spanish I Honors. This recycling allows the student to review and reacquire important vocabulary, grammar, and cultural concepts from Level 1 while at the same time acquiring new material in greater depth. The Spanish II Honors student maintains excellent study skills and strives to incorporate the skills necessary to use the language. Please refer to the Spanish II course description for additional information. Upon successful completion of the second year of study, the student will be able to converse in limited everyday situations.

Prerequisite: Spanish I or Spanish I Honors; and Enrollment in Spanish II Honors is only by Foreign Language Department recommendation.

654/655 Spanish III

Sophomores, Juniors, Seniors

1 year

1 credit

The third level of the language is designed for the student committed to serious acquisition of the language. The student will study all verb tenses and will incorporate this knowledge into oral and written language. In-depth vocabulary acquisition will be a focus throughout the year. Cooperative learning activities, Internet activities, selected literary works, current magazines, news media articles, and directed short compositions will provide the student with oral and written opportunities. The student will need to demonstrate a mature level of study for successful language acquisition. In addition, the course requires the continued serious commitment to oral proficiency and communication to achieve maximum development of the language. The course will enrich the student's awareness and appreciation for Hispanic culture.

Prerequisite: Spanish II or Spanish II Honors, and Foreign Language Department recommendation

656/657 Spanish IV

Juniors, Seniors

1 year

1 credit

The Level 4 student is seriously committed to refining the four basic language skills of reading, writing, speaking, and listening. The student will commit himself/herself to speak the language during class and to assimilate the language into daily life. Advanced grammatical structures and a amplified vocabulary will be developed in written reports and oral presentations. The student will develop skills in both oral and written extemporaneous and creative production. The study of culture continues with the student demonstrating a sensitivity to global awareness and global interaction and their effect on our daily lives. At the conclusion of the course, the dedicated and accomplished student will be able to communicate with a native speaker. There will be a short review of college foreign language placement test techniques and sample tests.

Prerequisite: Spanish III and Foreign Language Department recommendation

662/663 Spanish V

Seniors

1 year

1 credit

In addition to the Level 4 course description, the fifth year focus is on further development of writing skills with emphasis on a review of grammar, structure and idiomatic expressions, composition techniques, and increased fluency in spoken language. The Spanish V student truly demonstrates a sincere commitment to advancing individual language acquisition. Spanish is spoken in class. Selected readings, translations, short compositions, online websites, and Internet activities will develop competency and further language acquisition.

Prerequisites: Spanish IV and Foreign Language Department recommendation.

INDUSTRIAL EDUCATION

831/832 Basic Shop I

Seniors, Juniors

1 year

1 credit

The Basic Shop I class is designed to educate the students on safe and proper usage of woodworking tools while constructing a planned and organized project.

835/836 Basic Shop II

Seniors

1 year

1 credit

The Basic Shop II class includes continued usage of woodworking tools while planning, organizing, and constructing a project at an advanced level.

Prerequisite: Shop I

826/827 Essentials of Drafting

Seniors, Juniors

1 year

1 credit

This course will cover freehand sketching, pictorials in two and three dimensions, and orthographic projections. If time permits, during the second semester, class work includes a graphics program on the computer.

Prerequisite: Essentials of Geometry

828/829 Drafting

Seniors

1 year

1 credit

This course investigates graphic language. Material covered will include freehand sketching, machine drawings, projections, three dimensional pictorial drawings, and scaled architectural drawings. Also covered in drafting is computer aided drawing (CAD). This would appeal to persons hoping to become drafters, engineers, artists, and architects.

Prerequisite: A Geometry course

850/851/852/853 Building Trades I

Juniors

1 year 2 credits (Two periods a day)

This vocational course is designed to expose the student to all the fundamental aspects of residential construction. The student will initially be introduced to and required to follow all safety procedures in compliance with OSHA. This course allows the student to participate in many of the following: blueprint reading, foundation and concrete work, rough framing, roofing techniques, painting and drywall work, insulation methods, residential wiring, interior trimwork, and exterior work with brick, siding and soffit. It is planned that each year one new house will be constructed, allowing the student to be part of all phases of on-site construction. This course will also explore a variety of building materials used in home construction as well as different construction methods. Students who are enrolled in this course are not eligible for the Released Time Program in their senior year. Students must meet all graduation requirements, as well as maintaining passing grades in all their academic courses. Class size will be limited to 16 for safety requirements and to allow an adequate learning environment. Every student applying for this program will be evaluated by a class advisor, the instructor, and administration. Because of the format of this program, difficulties in conduct will not be tolerated. Grading will be determined through quizzes, completed projects and tasks, and final exam.

854/855/856/857 Building Trades II

Seniors

1 year 2 credits (Two periods a day)

***Dual Credit with KC (6 credit hours)**

This course is a continuation of Building Trades I, with emphasis on training the student for entry as an apprentice in one of the trades, or to continue their education in a specific trade. During this second year, tool and on-site safety is once again emphasized while also focusing on helping the student develop a work ethic, both on individual projects as well as working with others. Students in this class will also have the opportunity to interact with local building contractors, union representatives, OSHA compliance officers and safety coordinators. Grading will be the same as in Building Trades I.

Prerequisite: Building Trades I

***Seniors who completed Building Trades I and are enrolled in Building Trades II can earn 6 credit hours as part of the dual credit program with Kaskaskia College.**

MATHEMATICS

Students can enter the math curriculum at one of three levels:

A flow chart for the math curriculum is given on a following page. See the course descriptions for more details.

Several guidelines have been established to help teachers make recommendations to students as they move through the math curriculum.

They are

1. Incoming freshmen are recommended for a specific program based on their scores on the High School Placement Test.
2. Incoming freshmen who have studied Algebra I in elementary/junior high school are required to take the Algebra I Proficiency Exam and score 80% or higher to qualify to take Geometry as a freshman. Those passing this exam with at least 80% will receive one credit in Algebra I.
3. Freshmen wishing to take Geometry and Algebra 2 & Trigonometry in sophomore year must meet two out of the three requirements:
 - a. An "A" for each quarter in Algebra I
 - b. Algebra I teacher's recommendation with advisor input.
 - c. Score 80% or higher on Algebra I Proficiency Exam.

Failure Policy: If a student fails the first semester but passes the second semester, he or she does not need to repeat the first semester. The first semester grade of F remains on the transcript, but the student receives one full credit for the year course. If a student passes the first semester but fails the second semester, he or she must audit the first semester the following year before repeating the second semester.

410/411 Algebra I

Juniors, Sophomores, Freshmen

1 year

1 credit

This course is intended for the student who grasps the concepts of mathematics at an average or above average pace. The concepts included in the course are variables and open sentences; operations with real numbers, polynomials, and rational expressions. Students will solve linear equations and inequalities in one and two variables; factor polynomials, solve quadratic equations by factoring, graphing, and using the quadratic formula, and solve systems of equations and inequalities. Working with radicals, word problems, functions, the coordinate plane, slopes, and intercepts is also included.

Prerequisite: Department recommendation

415/416 Algebra I-Honors

Freshmen

1 year

1 credit

This course is intended for the accelerated freshman mathematics student. It develops the topics in Algebra in more depth and at a faster pace. In addition, the Algebra I Honors curriculum includes sums and differences of cubes, simplifying, multiplying and dividing rational expressions, mixed expressions, polynomial long divisions, the Pythagorean Theorem, and operations with radicals.

Prerequisite: Department recommendation

425/426 Essentials of Algebra I

Freshmen

1 year

1 credit

The topics addressed in this course include variables and open sentences, operations with real numbers, adding and subtracting polynomials, multiplying polynomials by monomials and polynomials by polynomials, dividing monomials, powers of monomials, solving equations in one variable, solving and graphing linear equations and linear systems, factoring polynomials and solving quadratic equations by factoring, slope intercept form, and word problems.

440/441 Geometry

Seniors, Juniors, Sophomores, Freshmen

1 year

1 credit

Designed to meet the needs of the average math student, this traditional geometry course includes study of the following topics: points, lines, planes, and angles; inductive and deductive reasoning; proofs; perpendicular and parallel lines and planes; congruent and similar figures; parallelograms; the Pythagorean Theorem; right triangle trigonometry; relationships among tangents, arcs, chords, and angles in a circle; and areas of circles and polygons. Other topics that may be addressed as time permits are geometric constructions, coordinate geometry, and/or surface area and volume of solids.

Prerequisites: Algebra I and teacher recommendation

442/443 Geometry Honors

Sophomores, Freshmen

1 year

1 credit

Designed to meet the needs of the accelerated mathematics student, this course develops the same concepts as the regular geometry course with the addition of coordinate geometry and volume and surface area of solids and perhaps geometric constructions and geometric probability. More rigorous than the regular geometry course, the treatment of topics is in greater depth and at a faster pace. Placement in an honors class is based on department recommendation.

Prerequisites: Algebra I or Algebra I Honors and teacher and department recommendation

444/445 Essentials of Geometry

Seniors, Juniors, Sophomores

1 year

1 credit

This course is designed for students from Algebra I or Essentials of Algebra. This particular geometry course studies the following topics: basic geometry figures and their properties, parallel and perpendicular lines and planes, angles, congruence, similarity, triangles, quadrilaterals, other polygons and circles. Additional topics include right triangle trigonometry, the Pythagorean Theorem, distance and midpoint formulas, area of polygons, surface area and volume of solids, and transformations on the coordinate plane.

Prerequisite: Algebra I, or Essentials of Algebra I and teacher recommendation

464/465 Essentials of Algebra II

Seniors, Juniors

1 year

1 credit

The topics addressed in this course include properties of real number, sums and differences of polynomials, transforming equations, graphing linear equations and inequalities, slopes, equations of lines in stand and slope-intercept form, solving and graphing systems of equations and inequalities, laws of exponents, multiplying and dividing polynomials, solving equalities through factoring, operations and equations with radical and complex numbers, quadratic functions, and their graphs, word problems and adding/subtracting matrices.

Prerequisites: Geometry or Essentials of Geometry and teacher recommendation

466/467 Algebra II

Seniors, Juniors

1 year

1 credit

Designed to prepare a student for college algebra, this course is open to the above average math student who has earned an A or B in Algebra I. The concepts developed include properties of real numbers, sums and differences of polynomials, transforming equations and formulas, relations and functions, graphing absolute value and linear equations and inequalities, slopes and equations of lines, solving systems of equations and inequalities in two variables, laws of exponents, multiplying and dividing polynomials, solving equations and inequalities through factoring, basic operations with rational expressions, operations and equations with radicals and complex numbers, quadratic functions and graphs, and word problems involving these concepts. This course covers eight or nine chapters in the Alg. II text and may be followed by Finite Mathematics and/or Intro. to Trig.

Prerequisites: An A or B in Algebra I, Geometry or Essentials of Geometry, teacher recommendation

470/471 Algebra II & Trigonometry

Seniors, Juniors, Sophomores

1 year

1 credit

This course is designed to meet the needs of the math student whose career and college plans necessitate the eventual study of calculus either at Mater Dei or in college. It challenges the student through a rigorous development of the following concepts and skills: properties of real and complex numbers; operations with real numbers, irrational numbers, complex numbers, algebraic expressions, polynomial expressions, and rational expressions; methods for solving linear equations, compound equations, absolute value equations, absolute value inequalities, quadratic equations, and first degree systems with two or three variables; graphing linear equations and inequalities; properties of linear and absolute value functions; factoring linear, quadratic, and cubic expressions; laws of exponents; simplifying radical expressions and solving equations involving radicals; equations and graphs of parabolic functions; circular and trigonometric functions and equations; and methods for solving triangles. Optional topics include matrices and graphing sine and cosine functions. This course covers ten or eleven chapters in the

Alg. II text, uses the honors grading scale, and may be followed by precalculus and/or Finite Mathematics.

Prerequisite: An A or B in Algebra I (Both Semesters), Geometry or Geometry Honors or concurrent enrollment, teacher recommendation

479 Finite Mathematics

Seniors

1 semester

1/2 credit

This course is designed for students who wish to maintain their math skills and concepts in preparation for college, but who do not wish to take precalculus or do not intend to pursue a math/science career. This course covers stocks, simple and compound interest, annuities, sinking funds, monthly payments, sets, Venn Diagrams, basic probability concepts, conditional probability, Bayes' Theorem, Permutations, Combinations, Bernoulli Trials and Expected Values. Optional areas include statistics.

Prerequisites: Algebra II or Algebra II Trig, teacher recommendation

482 Trigonometry

Seniors

1 semester

1/2 credit

This course begins with a thorough review of right triangle trigonometry from geometry and then introduces unit circle trigonometry, law of sines, law of cosines, and radians. This course is not open to students who have completed Algebra II Trig.

Prerequisites: Algebra II and teacher recommendation

483 Statistics

Seniors, Juniors

1 semester

1/2 credit

This introductory course is designed to present the core ideas of statistics: data analysis, some probability and standard statistical methods. Upon successful completion of this course students should be able to use statistical information to reason, evaluate news reports of a statistical nature, and have the basic understanding of statistics for college courses, particularly in the social sciences. The emphasis of this study will be on understanding how to use statistics to address real problems, rather than an emphasis on computations selected from a collection of complex formulas. Topics include displaying and describing distributions, scatterplots, least-square regression, correlation, categorical data, causation, experimental and sampling design, bias, probability, probability rules, discrete and continuous variables, the normal distribution, confidence intervals and tests of significance. Time permitting, significance testing of single proportions, two proportions, t-tests and other hypothesis testing will be covered.

Prerequisites: Algebra II or Algebra II/Trig

491/492 Precalculus

Seniors, Juniors

1 year

1 credit

Intended for the accelerated math student interested in pursuing the study of math and science in college, this course includes study of the following topics: advanced algebra concepts introduced in courses #472 and #473; properties and graphs of circular, trigonometric, polynomial, exponential, and logarithmic functions; mathematical induction; sequences and series; and vectors. Optional topics that may be addressed as time permits are matrices and the use of graphing calculators. This course uses the honors' grading scale. It is strongly recommended that, to be successful in precalculus, students will have earned an A or B in Algebra II Trig.

Prerequisites: Algebra II Trig and teacher recommendation

494/495 Calculus and Analytic Geometry

Seniors

1 year

1 credit

This course is designed for the very advanced student and is aimed at preparing the student to pass advanced placement tests when he or she enters college. This course covers behavior and graphs of functions, properties of limits, continuity, derivatives and integrals of polynomials, exponential and logarithmic functions, and other functions, applications of differentiation and integration to trigonometric functions, related rates, optimization and minimization, area, volume, and graphing, Mean Value and Rolle's Theorems, curve length, surface area, l'Hopital's Rule for integration, Inverse Trigonometric Functions, and special integration techniques. Optional areas include plane analytic geometry and polar coordinates. This course uses the honors grading scale.

Prerequisites: Precalculus and teacher recommendation

PHYSICAL EDUCATION

911 Health

Freshmen

1 semester

1/2 credit

This course will be taught to all freshmen. The course will stress the holistic approach to good health. The semester will be broken down into six major areas, The Human Body, Physical and Mental; Chemical Dependency; Nutrition; Sexually Transmitted Diseases; AIDS; and Standard First Aid. Teen suicide, problem solving methods, personal decisions with the emphasis in strong Catholic values and teachings will be highlighted. Through this course each student will develop an appreciation for a well-rounded, well-balanced life style. This course is required by the State Board of Education.

912 Physical Education I (Boys)

Freshmen

1 semester

1/2 credit

Emphasis will be placed on activities to include soccer, basketball, volleyball, softball and bowling. Various other physical activities also will be done throughout the semester. A weight training/conditioning program will be done two days a week. An agility day will also be included within the week.

917 Physical Education I (Girls)

Freshmen

1 semester

1/2 credit

This course is designed to allow the student to work on a variety of skills and team activities such as basketball, bowling, volleyball, speedball, soccer, softball, and track and field. Activities including fitness-wellness, physical fitness evaluations, fun runs, and exercises are included in this semester course. A weight training/conditioning program will be done two days a week. An agility day will also be included within the week.

920/921 Physical Education II (Boys)

Sophomores

1 year

1 credit

Emphasis will be placed on activities to include soccer, basketball, volleyball, softball and bowling. Various other physical activities also will be done throughout the year. A weight training/conditioning program will be done two days a week. An agility day will also be included within the week.

925/926 Physical Education II (Girls)

Sophomores

1 year

1 credit

This course is designed to allow the student to work on a variety of skills and team activities such as basketball, volleyball, bowling, archery, tennis, soccer, softball and track and field. Activities including fitness-wellness, physical fitness evaluation, fun runs, and exercises are included in this year-long course. A weight training/conditioning program will be done two days a week. An agility day will also be included within the week.

932 Physical Education III

Juniors

1 semester

1/2 credit

This course is designed for students to continue interpersonal skill development through a variety of lifetime skills such as golf, tennis, bowling, archery, badminton, table tennis, and fitness-wellness activities. Learning at this level deals with the role of physical education, sport and wellness in society, and making value judgments about the students' own well being.

935/936 PE Weightlifting/Conditioning

Seniors, Juniors, Sophomores

1 semester

1/2 credit

2 semesters

1 credit

Dual Credit with KC (1 credit per semester)

Students will have the opportunity to participate in general and sports-specific strength and conditioning. Strength, power, speed, acceleration, endurance, motor skills and agility drills are taught and practiced. The semester class will include general physical preparation, sport fitness and conditioning. Students will continue to learn about the principle of year-round conditioning.

Prerequisite: Department recommendation

942 Physical Education IV

Seniors

1 semester

1/2 credit

This course is designed for students to maintain their positive attitude toward fitness-wellness activities and to stay physically active throughout their lives. Activities at this level will be lifetime skills in archery, badminton, bowling, golf, team handball, tennis, pickle ball, cycling, and fitness-wellness activities.

RELEASED-TIME PROGRAM

006 Released Time Program

Seniors

Semester 2

No Credit

Through special arrangements, a junior student may request to register for the Released-Time Program for the second semester of the senior year. In order to qualify for the program, the student must be in good academic standing, with at least a 2.0 G.P.A. and must have completed all school graduation requirements with the exception of religion and English by the conclusion of the first semester of the senior year. While participating in the program, the student must carry an academic schedule of no less than four classes including English and Religion. There will be no academic credit awarded for Released Time and no grade for the program will be recorded.

Prior to registering for the program, the student must submit to the principal, a letter from the parents granting permission to participate in the program and assuming responsibility for the student. A letter from the employer indicating the days and times of work, plus a commitment from the employer to accept the responsibility for the student during those hours of the regular school day must be submitted prior to the beginning of the actual participation in the program. The student will sign an agreement.

It is the responsibility of the student to secure a place of employment, preferably in a skilled or semi-skilled occupation. The student may be paid for his/her work by the employer and will need to provide his/her own transportation. Each day when leaving school, the student must sign out at the main office desk and record the time of leaving school.

Notice: Students who are in the Building Trades Program are not eligible for Released Time Program.

SCIENCE

524/525 Physical Science A

Freshmen

1 year

1 credit

This course introduces the student to physical science, life science, earth science, and ecology. Some of the topics investigated include electricity, magnetism, chemistry, meteorology, astronomy, and geology. This course meets high school graduation requirements. This is done through ordinary classroom procedure, laboratory experimentation, and learning activities involving the use of the library and internet.

503/504 Physical Science

Freshmen

1 year

1 credit

This course is an introduction to the study of matter and energy. In this study of non-living material, some of the topics investigated include chemistry, the laws of motion, simple machines, mechanics, magnetism, electrical, and nuclear energy. Lab work and lectures are utilized in this course. Placement in this class is based on department recommendations.

505/506 Physical Science - Honors

Freshmen

1 year

1 credit

This course is intended for accelerated science students. It is an introduction to the study of matter and energy. Some of the topics investigated include metrics, chemistry, simple machines, electrical energy, and clean water systems. Lectures and lab work are part of this course. Each semester a research project on selected topics will be completed. Placement in an honors class is based on department recommendations.

514/515 Earth Science

Seniors, Juniors

1 year

1 credit

This course can help the student understand the nature of the earth's environment and how man's activities are affecting it. The student will study the earth's position in our universe, its characteristics, including how the surface has changed over time, weather, climate, the oceans, and an introduction to geology. This is done through ordinary classroom procedure, and learning activities involving the use of the library and internet.

Prerequisites: Biology A or Biology, 2 years of math, and the instructor's approval

520/521 Chemistry

Seniors, Juniors

1 year

1 credit

This course is designed to introduce students to the science of chemistry. Some of the concepts covered are the atomic theory, kinetic theory, gas laws, equilibrium reactions, and acid-base theory. Laboratory work is part of this course.

Prerequisites: Algebra I and Geometry or Algebra II. If the student did not take physical science, the approval of the instructor is necessary.

522/523 Chemistry Honors

Seniors, Juniors

1 year

1 credit

This course is similar to 520/521 Chemistry but is intended to provide the student with a broader knowledge and a deeper understanding of scientific concepts of chemistry. A greater facility in handling mathematical concepts is necessary. Laboratory work is a part of this course. Placement in an honors class is based on department recommendation.

Prerequisites: Concurrent enrollment in Precalculus is desirable. Minimum requirement is enrollment in Algebra II-Trig or department recommendation.

533 Chemistry II

Seniors

1 semester

1/2 credit

Dual Credit with KC(4 credit hours)

This course is designed for the student wishing to pursue more advanced topics in chemistry. Topics covered are oxidation-reduction reactions, electrochemistry, reaction rates, thermodynamics, nuclear chemistry, and introduction to organic chemistry. Laboratory work is a part of this course.

Prerequisites: Chemistry, Algebra II-Trig or department recommendation

526/527 Biology A

Sophomores

1 year

1 credit

This course is intended for the student who has successfully completed Physical Science A or Physical Science. This course will cover the structures and functions of living organisms. Some of the topics studied are plants, animals, genetics, cell structure, biochemistry, and human biology.

545/546 Biology

Sophomores

1 year

1 credit

This course is designed to expose students to concepts concerning various forms of life. This includes the structure and function of cells of plants and animals, and an introduction to genetics, classification, invertebrates, vertebrates, and human biology. A careful observation of the environment will be investigated. Lectures and laboratory work are utilized.

547/548 Biology - Honors

Sophomores

1 year

1 credit

This course is similar to 545/546 Biology but is intended to provide the student with a broader knowledge and a deeper understanding of scientific concepts of biology. The students examine a broad spectrum of themes including biochemistry, cell structure, genetics, evolution, microorganisms, plants, invertebrates, vertebrates, and human biology. Lectures and laboratory work are utilized in this course. Placement in an honors class is based on department recommendation.

552/553 Physics

Seniors

1 year

1 credit

This course is designed for the student interested in science and math. Topics include classical mechanics, electricity, and magnetism, wave lengths, sound, light, and optics. Laboratory work is part of this course.

Prerequisites: Chemistry, a minimum of Algebra II (Algebra II-Trig is recommended) and department recommendation.

555 Biology II

Seniors

1 semester

1/2 credit

Biology II will focus on some of the unifying concepts in biology, such as diversification and adaptation, classification, development, and ecology. Serious attention to our environment and the importance of plants to our environment will be part of this course. Each student will utilize the scientific method in his/her studies and lab work.

Prerequisite: 545/546 Biology or 547/548 Biology with a grade of B or higher.

557 Anatomy and Physiology

Seniors

1 semester

1/2 credit

This course is offered especially for students going into medical fields, but it may be of interest to other students. The course is an introduction to human anatomy. Emphasis is on each body system of the human. Lab work is utilized and a thorough cat dissection is completed at the end of the semester.

Prerequisites: 545/546 Biology or 547/548 Biology with a grade of B or higher.

558/559 Physics Honors

Seniors

1 year

1 credit

Dual Credit with KC(4 credit hours)

This course is designed for the advanced science student who is interested in a more detailed and faster paced investigation of the basic concepts of Physics. Topics include classical mechanics, electricity and magnetism, wave mechanics, sound, light, and optics. Lab investigations, special projects, and research will also be included. Mastery of algebra, geometry, and trigonometry is essential.

Prerequisites: Chemistry, Precalculus or concurrent enrollment, science department recommendation, or approval of the instructor.

570/571 Infinity Project

Seniors

1 year

1 credit

The Infinity Project is a pre-engineering program intended to increase interest in engineering and technology careers. The program follows a curriculum and uses materials developed by the Southern Methodist University and Texas Instruments. Students will use a Digital Signal Processor and the Visual Applications Builder object-oriented software package to design, build, and test various engineering and technology projects. Course materials focus on digital systems, but paradigms used by all engineering genres are discussed and investigated. The second semester includes one large class design project intended to emulate a complex system, requiring communication and interaction between different engineering groups.

Prerequisites: Concurrent enrollment in Calculus (494/495) and Physics (552/553) or Physics Honors (558/559), or instructor approval.

574/575 Intro to Engineering**Seniors, Juniors, Sophomores****1 semester****½ credit**

This course is designed to introduce students to the field of engineering. The different disciplines of engineering are explored. STEM projects will be an integral part of this course.

576/577 Introduction to Agriculture**Seniors, Juniors, Sophomores****1 semester****½ credit**

This course provides an opportunity for students to learn various aspects of the field of agriculture. Topics included are agricultural business, animal science, and crop and plant science.

SOCIAL STUDIES**302/303 World History****Seniors, Sophomores****1 year****1 credit**

The essence of the course is to acquaint the student with a compact survey of the development of civilization from ancient to modern times. It is a record of human progress and the influence it has on the world today.

307 American Government**Freshmen****1 semester****½ credit**

This is a required course devoted to the origins and the principles of the government and Constitution of the United States. Much emphasis is placed on the United States and Illinois Constitutions, the Declaration of Independence, the flexibility and success of the United States Constitution, and the structure and functions of the legislative, executive, and judicial branches of government. Students will also gain an understanding of the importance of good citizenship and how essential individual participation is in a republic. Students will be required to pass both the Illinois and United States Constitution Tests.

310/311 American History**Juniors****1 year****1 credit**

This course covers American history from colonial days to WWII. It gives the student an overall view of the major events in American history along with some idea of how they are related to each other. Included in the presentation are cultural diversity, democratic values, economic factors, global relations, and technology in shaping America then and now. "Who we are is based on what we were". This is a required course for junior year.

312/313 A.P. American History**Juniors****1 year****1 credit**

This is an Advanced Placement course, designed to prepare students for the advanced placement examination to be written in the spring. (There is an \$80 fee for each student to take the AP exam). The program covers the colonial period to the present. Designed to provide students with analytic skills and factual knowledge necessary to deal critically with the problems and materials in U.S. History, it also helps students develop skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively in essay format.

Prerequisite: Departmental approval

321 Modern American History

Seniors

1 semester

1/2 credit

This class covers World War II to the present day, focusing on the post-war period; special emphasis is given to the Cold War, the civil rights' struggle, changing American life styles and economics, the New Frontier and the Great Society, the Vietnam War, the Gulf War and new challenges for the U.S., from 1980 to the present. The focus is on foreign policy, domestic issues, and societal changes.

Prerequisite: American History

332 Sociology

Seniors

1 semester

1/2 credit

Dual Credit with KC (3 credit hours)

An introductory examination of the nature of group behavior, social institutions and social processes. Emphasis is placed on social change, individualism, and group pressures. Sociology is the scientific study of human relationships and the interaction that takes place within the social environment. The course presents an introduction to the study of society and culture, the processes of socialization and the structures that comprise societies. This course seeks to provide broad coverage of the field of sociology, introducing the theories, research, and applications that constitute the discipline emphasizing the substantial diversity both within the field of sociology and in society by presenting material that reflects sociology's increasing concern with cultural, gender, racial, and ethnic issues.

340 General Psychology

Seniors

1 semester

1/2 credit

Dual Credit with KC (3 credit hours)

A general introductory course which seeks to understand human behavior. Study units include topics such as intelligence, motivation, human development, personality psychological disorder methods of therapy and psychology, emotions, senses, perception, learning, memory, and thinking. Course objectives are to provide broad coverage of the field of psychology, introducing the theories, research, and applications that constitute the discipline, to arouse intellectual curiosity and build an appreciation for the relevance of psychology, and to serve as an impetus for students to think critically about psychological phenomena, particularly those that have an impact on their everyday lives. This course seeks to illustrate the substantial diversity within the field of psychology and in society by presenting material that reflects the discipline's increasing concern with cultural, gender, racial, and ethnic issues.

Prerequisite: G.P.A. of B or higher

341 Current World Issues

Seniors

1 semester

1/2 credit

A study of current world issues, including ecological, economic, political, military, and social issues. The focus is on individual research, team projects, and facilitation of group discussion. Current events are emphasized, with background and historical research to further a deeper understanding of the subject, underlying causes, and possible resolutions. Emphasis will also be placed on understanding how other nationalities, ethnic groups, and geographic areas perceive these issues.

342 Global Studies**Seniors, Juniors****1 semester****1/2 credit**

This course provides students with the opportunity to explore what is happening in various regions and civilizations at a given time. Additionally, it enables students to investigate issues, themes, and global connections and linkages. Topics covered include the geography, history, economy, government, and relevant current events applicable to the regions studied. A comprehensive understanding of globalization, what it is and what its effects are, both politically and economically, on both the developed world and the developing world, will be emphasized. Environmental issues, including population growth and migration, climate change, industrial and agricultural impacts on soil and water resources, including the world's oceans, will receive special attention.

746 Marketing**Seniors, Juniors****1 semester****1/2 credit**

This course offers a comprehensive overview of the field of marketing. Curriculum covered will include market research, marketing careers, and the marketing mix. Determination of various market segments, based on various types of psychological and social influences on consumer behavior, will be inclusive in this course. Students will be required to actively participate in a group business project. (This course may fulfill a Social Studies credit for some colleges).
